

Details On The New Mercedes SL 55 And SL 65 AMG

{mosgoogle right} A little while back, we brought you details of the newest Mercedes SL-Class, a car that features a number of subtle enhancements while keeping the same look and feel of its predecessor. Not to be outdone by their non-AMG brethren, both the Mercedes SL 55 AMG and the SL 65 AMG have undergone a slight tweaking as well, and today DaimlerChrysler has put out a press release detailing exactly what prospective owners can expect to see begin hitting dealerships in the coming months. As is the case with all AMG models, it's unfair to mention either the SL 55 or the SL 65 without boasting of the power they possess. The SL 65 will maintain its trademark AMG 6.0-litre V12 biturbo, an engine capable of developing 450 kW/612 hp and making the SL 65 the most powerful production roadster in the world.
