

More To Play With: Mercedes Introduces Optional New AMG Performance Package For The E63 AMG

Mercedes has announced today that customers looking to add a little extra spice to the already sultry E63 AMG are in luck, with the company introducing an optional AMG performance package for the 514 horsepower saloon. Designed to enhance the handling dynamics, motorsport potential and individuality of the model, the AMG performance package consists of 18-inch five-spoke AMG alloy wheels painted sterling silver; AMG performance suspension with firmer tuning, based on AIRMATIC DC; multi-disc rear locking differential with 40% locking effect, providing more traction when accelerating out of corners; and an AMG ergonomic sports steering wheel in leather/black Alcantara along with silver-colored shift paddles...
