

Another Look At The BRABUS SL: The Exclusive BRABUS Sport Program For The New SL-Class

A little more than a week ago we brought you the first details and images of the new BRABUS tuning package for the updated Mercedes-Benz SL-Class. Today, the company has released a more complete list of specs and additional high resolution photos of what tuning products are available for the forthcoming models, starting with the BRABUS 4.0 displacement package for the SL280 and 350 models (332hp / 244kW and 420Nm torque) all the way up to the awe-inspiring SV12 S Biturbo package for the SL600 (730hp / 537kW and 1,320Nm torque).
